To Our Shareholders

2014 was a year in which your Company grew. Revenue was \$4,030 million, compared with \$3,720 million in 2013, and net income was \$120 million. Adjusted EBITDA was \$640 million.

Advanced Materials contributed most to the year's result, with revenue up \$170 million. The balance of our portfolio is deliberate: when chemicals are weak, power and storage are usually not, and the port earns in both.

Among the year's milestones: commissions Perttula Separation Facility.

We invested \$234 million in capital projects and returned \$99 million to shareholders in dividends, which we have now paid without interruption since 1989. Our first call on capital remains the integrity of the Perttula site: the levee, the jetties, the cell house and the caverns.

Nothing we report matters more than that number. We employed 9,900 people at year end, a great many of them in a town this Company laid out in 1919 and still serves with power, water and housing.

Thank you for your continued confidence in Isla Perttula Corporation.

Walter H. Cardwell III
Chairman and Chief Executive Officer

Management's Discussion and Analysis

Results of Operations

Revenue of 4,030 million increased 310 million, or 8.3 percent, from 3,720 million in 2013. The change was driven principally by Advanced Materials (+170 million) and Logistics (+70 million). Adjusted EBITDA was 640 million, compared with 660 million in the prior year, and net income was 120 million, or \$0.72 per diluted share.

Depreciation and amortization was 250 million, reflecting the capital intensity of the Perttula site. Interest expense was 234 million on average total debt of 4,250 million. The effective tax rate was 23.0 percent.

Liquidity and Capital Resources

Cash provided by operating activities was 354 million. Capital expenditures of 234 million were directed principally to sustaining capital at Perttula Works, debottlenecking at the Perttula Separation Facility, and dock and channel maintenance at the Port of Perttula. The Company paid dividends of 99 million. At year end, cash and equivalents were 350 million and total debt was 4,250 million.

Critical Accounting Estimates

The Company's most significant estimates relate to asset retirement and environmental remediation obligations, the useful lives of long-lived assets, and the recoverability of capitalized development costs at mineral properties. Changes in regulatory requirements or in the expected timing of remediation could materially affect the recorded liability.
